Cedar Apps

Cedar Apps are professional tools that combine records management with spatial analysis.

DevelopmentApp
• track and analyse project applications
• assess impacts

HeritageApp
• record and store traditional knowledge

EcosystemsApp
• collect data on mobile forms

Cedar Apps are integrated. Heritage and Ecosystems data can be used to assess project applications and referrals.

HeritageApp
Collect and manage traditional knowledge interview data including archives

EcosystemsApp
Collect and manage forms, photos, video and location data

DevelopmentApp
Track and assess (with maps!) development project applications

Why Cedar?

1. Secure
2. Easy to use
3. Collaborative
4. Spatial
5. Extendable
6. Rich business intelligence
7. Knowledge mobilizing
8. Mobile friendly
9. Secure on your mini-server
10. or on our Cedar Cloud

cedarbox.ca

Cedar Apps are secure, web-based, map-enabled collaboration tools that run on your CedarBox mini-server, locked down to your stewardship or hertiage office.

Alternatively, your Cedar Apps can be hosted on GeoMemes' secure Cedar Cloud.
