# Industry Recognition

Developed in partnership with 2GoLockers and Mighty Oaks, the stores retains its focus on organic eggs while offering a range of products from local farms or processors in the area, including local milk, chicken, roasted coffee and bacon. Several products are prepared by local restaurants and are exclusive to this location. Customers select their products via a dedicated terminal, pay via credit card, and collect from the relevant locker.

Although unstaffed stores remain relatively rare, it is interesting to note how quickly the technology has moved into non-traditional channels. Brightside Market meets the need for fresh, local and convenient products, creating one of the most contemporary farm store concepts globally”
